

HW2 BlueTeam Collaboration

Brandon Bench: Helped to write the readme. Co-wrote ExtractFeaturesMagic.m file and the supporting code in hw2.m. Helped debug and analyze issues during the completion of this hw. Peer Programmed. Helped brainstorm what methods we would use for preprocessing of the dataset.

Nick DeMarco: Wrote portions of ExtractFeaturesMagic.m and hw2_template.m. Ran testing on different wavelets to attempt better accuracy. Wrote explanation as to why Haar was faster than Coif. Debugging and peer programming.

Kristine Nutter: Helped to write the readme and co-wrote the delivery report. Debugged and tested different wavelets and code itself. Helped to determine how to achieve a better accuracy. Peer programmed.

Matt Washburn: Made the project able to be ran through easily. Wrote testing features and figure saving methods. Wrote report generation function for figures.
